7.2 Best Practices

7.2 Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.

Best Practice 1: SNEHAMRUTHAM – A Social Outreach Program

“Manava Seva Madhava Seva” – Service to Mankind is Service to God.

Any society's destiny is determined by the character and competency of its youth. Young people require supervision to help them develop character and competence by giving them direction and a feeling of purpose. They require partnerships that exemplify and convey high expectations. They must participate in activities that are difficult and motivating, as well as educational. Many of the conditions for young people's development of character and competence have deteriorated in recent years. Young people frequently face inattention, low expectations, cynicism, or communal strife. If we want to establish a society where young people may reach their greatest potential, we must improve all of these conditions. Considering this, our College initiated a social outreach programme called **SNEHAMRUTHAM**.

As an educational institution, MOUNT ZION tries to impart the idea of ‘Concern for the other’ to our students, for we believe that the ultimate aim of education is the harmonious coexistence of all living beings.

The objectives of the initiative “**SNEHAMRUTHAM**” is:

1. To donate food to worthy people or organisations in order to counter poverty and hunger.
2. To alleviate food insecurity among the weaker sections of the society.
3. To cultivate social responsibility among the youth of the nation.
4. To impart the value of ‘concern for the other’ among the students.
5. To implant an empathetic and socially responsible attitude among the students.
